

Memo To: Nye's Valued Customers

From: Martin J Weinstein, Director of Quality / Process Engineering

Date: February 1, 2016

Subject: Nye Shelf Life Policy

Nye manufactures and packages high quality and valued synthetic lubricants. Our synthetic materials vary in chemistries and additives. As a standard practice, Nye's shelf life policy is that our material will maintain its integrity for four years from the date of shipment. In some chemistries, a minor folding process may be required to "fold" the oil back into the grease. This process is simple and a video is available on our website to assist you <http://www.nyelubricants.com/video-instructions-on-oil-separation>. The separation of oil from grease is a natural phenomenon and does not affect the shelf life of the material.

In specific cases, where material does expire in less than four years, it will be called out on the Certificate of Analysis. If any of our customer's require additional information on shelf life, please contact Nye customer service at 1.508.996.6721.
